**“Provide quality products, competitively priced and delivered on time with total customer satisfaction. A simple promise in a complex world.”**

Gear Keeper Retractors are built by Hammerhead Industries, Inc., the world’s leading manufacturer of personal tethering equipment including retracting lanyards for tools, gear and instruments. Covered by numerous patents, Gear Keeper products are precision-made systems that keep gear and instruments safe, secure and close at hand.

### There is nothing random about our Quality. Our Guarantee.

All of the company’s products are built “Hammerhead Tough” in the USA. Hammerhead Industries warrants its products against manufacturing defects in workmanship and materials. If you are not satisfied with the quality or performance of any Hammerhead product, we will replace it or refund your money within 30 days after purchase through your original dealer or retailer. The warranty is void if the product has been abused beyond normal wear and tear or used for purposes other than intended.

## Retractable Gear Attachment Systems

First engineered for SCUBA diving, the Gear Keeper is a rugged, retractable gear attachment system, designed to utilize and protect gear in severe environments with maximum break strength and durability.

The Gear Keeper is at the core of an extensive product line that boasts an impressive array of benefits and features. A patented flushing system that clears sand and debris from the unit, and is salt-water proof. A patented Q/C Connector System that provides quick and easy connection/disconnection of gear.

The RT2/RT4 Series features 60# break-strength, either Stainless Steel nylon coated cable or Spectra/Nylon line and a high impact housing. The RT3 Series features 80# break strength, Spectra/Nylon line, and a high-impact housing. Both are available in multiple retraction forces and mounting options for any gear you need to keep handy and can’t afford to lose.

Retractable Side Arm Tethers provide a low-profile lanyard to prevent snagging while allowing full mobility. Additionally the defined break-away point provides safety should entanglement occur and the exclusive Q/C Connector system provides easy disconnection of firearm. Avoid the constant entanglement and hassels of coil-type lanyards.

New 360° Rotating MOLLE Mount provides a secure and compact mount to the MOLLE system that also allows the Gear Keeper to rotate during use minimizing resistance and line fatigue.

New Integrated Gear Holster provides the benefits of a holster with the security/ease of use of a retractable tether.

**Grab your gear, use it, let it go — it retracts back every time!**

Gear Keeper makes whatever you’re doing easier while preventing loss or damage to your valuable gear.
